THE GLOBAL LEADER IN FIBER OPTIC TOOLS

ABOUT US

Founded in 1958, Jonard Tools has been engineering and designing tools that move the industry forward and connect the world. The team at Jonard Tools has worked closely with Fiber Optic technicians, Fiber Optic cable manufactures, and industry specialists to engineer Fiber Optic tools that are Made for Life® with a lifetime warranty. With a collection of Fiber Optic Tools to select from, our team has engineered Fiber Optic tools that allow Fiber technicians to strip, prepare, clean, connect, and test Fiber Optic cables.

FIBER OPTIC TOOLS

Fiber optics uses flexible fibers of glass to transmit light signals that allow for higher bandwidths and longer distances than traditional wires. Optical fibers are as thin as a human hair and carry large amounts of data for telecommunication, television, and computer networking. Fiber optic cables usually consist of a core surrounded by cladding, buffer tubes, and an outer jacket. Jonard fiber tools aid in stripping, prepping, connecting, cleaning, and terminating simplex fiber cables, drop cables for FTTH, distribution, and blown fiber cables.
